PROFESSIONAL SUMMARY

Motivated Computer Science student with strong foundations in Data Structures and Algorithms and full-stack development. Skilled in solving complex problems with efficient algorithms and optimizing backend workflows. Proficient in writing clean, optimized code focused on performance and system efficiency.

EDUCATION

MIT – World Peace University

Bachelor of Computer Science and Engineering | CGPA: 8.51 / 10.00

Pune, India

Jul 2023 – Present

Ekayanaa School

Class 12th | Percentage: 89%

Apr 2022 – Mar 2023

Ekayanaa School

Class 10th | Percentage: 80.20%

Apr 2020 – Mar 2021

SKILLS

Programming Languages: C, C++, Java, Python

Tools & Platforms: VS Code, MySQL Workbench, Git, GitHub, Postman

Web Technologies: HTML, CSS, JavaScript, React, Node.js, Express.js

Databases: MySQL, MongoDB

Machine Learning: NumPy, Pandas, Scikit-learn, Data Preprocessing, Exploratory Data Analysis (EDA), Feature Engineering, Machine Learning Fundamentals, Model Evaluation Metrics

Core Concepts: Data Structures and Algorithms, Object-Oriented Programming, REST APIs, Database Design

Soft Skills: Communication, Teamwork, Problem Solving, Critical Thinking

Languages: English, Hindi

PROJECTS

InternTrack Pro | *Full-Stack Web Application* | [GitHub](#)

- Built a full-stack MERN internship management platform with role-based access control for students and admins across 10+ functional modules.
- Developed an AI-powered resume analyzer with ATS compatibility scoring, processing PDF uploads via pdf-parse and generating keyword-based feedback with a 100-point evaluation system.
- Designed 5 normalized MongoDB schemas with aggregation pipelines powering real-time analytics dashboards featuring interactive Recharts visualizations.
- **Technologies Used:** React, Node.js, Express, MongoDB, JWT, Recharts, Multer, REST APIs

Meeting Task Generator | *Deep Learning Pipeline* | [GitHub](#)

- Engineered a modular deep learning pipeline for automated meeting analysis, integrating transcription, speaker identification, and abstractive summarization.
- Leveraged **OpenAI Whisper** for robust speech-to-text and **pyannote.audio** for speaker diarization, processing complex audio from the AMI Meeting Corpus.
- Developed action item extraction logic using **spaCy NER** and **BART-MNLI**, automatically identifying tasks, deadlines, and assignees from transcripts.
- **Technologies Used:** Python, Whisper, BART-large-CNN, spaCy, PyTorch, Streamlit

Finance Tracker | *Database / Backend Project* | [GitHub](#)

- Designed a normalized schema across 5–7 linked tables managing 100+ records, enforcing referential integrity and eliminating redundancy.
- Developed stored procedures and triggers to automate monthly reports, compute net savings, and recalculate balances on every transaction.
- Built a Python CLI with parameterized queries for secure CRUD operations and efficient category-wise retrieval via optimized SQL JOINS.
- **Technologies Used:** MySQL, SQL, Python, Stored Procedures, Triggers, Query Optimization

EXTRACURRICULAR / ACCOMPLISHMENTS

Smart India Hackathon (SIH) — Participated and cleared the internal college Round 1 selection.
