

VEDANT GUPTA

+91 91119 93090 ◇ Pune, India

vedgupta930@gmail.com ◇ linkedin.com/in/vedant-gupta-755427365

PROFESSIONAL SUMMARY

Motivated Computer Science student with strong foundations in Data Structures and Algorithms and full-stack development. Skilled in solving complex problems with efficient algorithms and optimizing backend workflows. Proficient in writing clean, optimized code focused on performance and system efficiency.

EDUCATION

Bachelor of Computer Science and Engineering, MIT – World Peace University Jul 2023 – Present
CGPA: 8.51 / 10.00

Class 12th, Ekayanaa School Apr 2022 – Mar 2023
Percentage: 89%

Class 10th, Ekayanaa School Apr 2020 – Mar 2021
Percentage: 80.20%

SKILLS

Programming Languages	C, C++, Python, MySQL
Tools & Platforms	VS Code, MySQL Workbench, Git, GitHub, Postman
Databases	MySQL, MongoDB
Soft Skills	Communication, Teamwork, Problem Solving, Critical Thinking
Languages	English, Hindi

PROJECTS

Hotel Management System | *OOP / Systems Project* | [GitHub](#)

- Designed a multi-class hierarchy supporting Normal and VIP customer types, with dynamic billing logic that computes charges based on customer category, room type, and number of days stayed.
- Built a file-based persistence system that saves and fully restores all customer and booking records between sessions, accurately reconstructing each customer type and associated data on every program startup.
- Developed a menu-driven CLI with background file-saving on exit, supporting end-to-end operations including booking creation, dynamic bill generation, and complete customer record management.

Technologies Used: *C++, OOP, STL, Smart Pointers, File Handling, Multithreading*

Finance Tracker | *Database / Backend Project* | [GitHub](#)

- Designed a normalized relational schema across 5–7 linked tables to manage 100+ transaction records, enforcing referential integrity and eliminating redundancy across all financial categories and accounts.
- Developed stored procedures and triggers to automate monthly report generation, compute net savings metrics, and recalculate account balances in real time on every insert and update operation.
- Built a Python CLI using parameterized queries for secure CRUD operations, preventing SQL injection and enabling efficient category-wise data retrieval through optimized multi-table SQL JOINS.

Technologies Used: *MySQL, SQL, Python, Stored Procedures, Triggers, Query Optimization*

EXTRACURRICULAR / ACCOMPLISHMENTS

- Smart India Hackathon (SIH)** — Participated and cleared the internal college Round 1 selection.
